## Early Years Networks Have Talent

Members of early years networks and other key champions in WA are invited to attend the next big gathering to share ideas, challenges, opportunities and best practice.

The day will open with key note speaker, Professor Fiona Stanley (Patron, Telethon Kids Institute

Distinguished Research Professor,  
University of Western Australia

Vice Chancellor's Fellow, University of Melbourne). Enjoy presentations from early years networks about their experiences in working in the community and the journey towards what their network is today. During the day you will be a part of activities that help early years networks to flourish.

Walk away with new connections as well as practical ideas trialled and tested by other early years
